20 June 1957

Requested Evaluation of [REDACTED]

[REDACTED] 25X1X7

1. A considerable amount of very good unclassified information is obtained from this source.
2. A good percent of the information is new. Unfortunately, there is quite a time-lag in the receipt of this information. The most desirable improvement would be to speed up the distribution.
3. It is desirable to clip information of this sort; hence, it would be a great help if it was printed on just one side of the paper.
